TABLE OF CONTENTS

Rugged RJ45 Solutions

NEW CAT6	RJFRB: plastic circular shell - reverse bayonet coupling, IDC & PCB Tails receptacles	3
	RJF544: plastic circular shell - push pull coupling	6
	RJFEZ: plastic rectangular shell - lever coupling	8
	RJF: metallic circular shell based on MIL-C-26482 - bayonet coupling	10
	RJF - special receptacles: right angle, cable mount inline and PCB tails receptacles	13
	RJFTV: metallic circular shell based on MIL-DTL-38999 series III - thread coupling with anti-decoupling device	15
NEW	Self Closing Cap for square flange RJFTV receptacles	18
	RJFTV - receptacles and plugs with 360° EMI backshells	19
	RJFTV - special receptacles: right angle, through bulkhead and PC tails receptacles	21
	RJF-RJFTV Sealed: transversally sealed RJF and RJFTV receptacles	24
	High Reliability Cat5E cable and cordsets	25

Rugged USB-A and USB-B solutions (USB2.0)

	USBFTV: rugged USB-A - metallic circular shell based on MIL-DTL-38999 series III - thread coupling with anti-decoupling device	26
	USBFTV: special versions: receptacles with 360° EMI backshells - PC tails receptacles	29
NEW	USBFTV memory key	30
NEW	USBF memory key	31
NEW	High Reliability USB2.0 cordsets	32
	USBBF: rugged USB-B - plastic circular shell - thread coupling	33

Rugged IEEE1394 solutions

	FWFTV: metallic circular shell based on MIL-DTL-38999 series III - thread coupling with anti-decoupling device	34
--	--	----

Rugged RJ45 / USB-A / IEEE1394 receptacles with self closing cap

	Self Closing Cap	37
--	------------------------	----

Rugged RJ11/RJ12 solutions

NEW	RJ11F: metallic circular shell based on MIL-C-26482 - bayonet coupling	38
------------	--	----

Rugged MTRJ and LC (fiber optic) solutions

	MTRJF: metallic circular shell based on MIL-DTL-38999 series III - thread coupling with anti-decoupling device	40
	LCF: metallic circular shell based on MIL-DTL-38999 series III - thread coupling with anti-decoupling device	42

Rugged Ethernet Switches

	5 or 9 ports IP30 Switch - Unmanaged, Ring or managed	44
	5 ports IP67 Switch - Fiber glass reinforced Polyester enclosure - Unmanaged or Ring	47
NEW	9 ports IP67 Switch - Aluminum enclosure with olive drab cadmium plating - Unmanaged or managed - Gigabit	51

Communications

RJFIELD CONCEPT

The Amphenol Field Series allows you to transform a standard infocom cordset into a rugged waterproof connector for harsh environments.

RJ field allows you to use Ethernet Class D / Cat. 5e connections for 10 Base T, 100 Base TX or 1000 Base T networks in extreme environments.

EXAMPLE FOR RJ 45 CORDSET

- A full range of versions depending upon the application
- No cabling operation nor measurement required after installation
- Sealing: IP67 (1 meter immersion for up to 30 minutes)
- Shock, vibration and traction resistant
- Inline extension
- Mechanical coding/polarization
- EMI protection

RJFRB allows you to use an Ethernet Class D / Cat. 5e and Class E/Cat 6 connection for 10 BaseT, 100 BaseTX or 1000 BaseT networks in harsh environments.

With the patented RJStop® system you can use a standard RJ45 cordset in a protective composite plug which will protect it from shocks, dust and fluids.

No hazardous on-field cabling and grounding!

MAIN CHARACTERISTICS

- Sealed against fluids and dust (IP67)
- Shock, Vibration and Traction resistant
- No cabling operation in field, no tools required
- **Reverse bayonet coupling**
- RJ45 cordset retention in the plug: 70 N in the axis
- Mating cycles: 500 min
- Compatible with cable diameter from 5,5 mm [0.216 in] to 7 mm [0.275 in]

Ethernet Connection System for Harsh Environment – Industrial Ethernet

RJF544 allows you to use an Ethernet Class D / Cat. 5e connection for 10 BaseT, 100 BaseTX or 1000 BaseT networks in harsh environments: With the patented RJStop® system you can use a standard RJ45 cordset in a protective composite plug which will protect it from shocks, dust and fluids.
No hazardous on-field cabling and grounding!

ROHS COMPLIANT

MAIN CHARACTERISTICS

- Compliant with IEC 60603-7 variant 12
- Shock, Vibration and Traction resistant
- No cabling operation in field and no tools required
- Sealed against fluids and dust (IP67)
- Quick Push Pull coupling
- RJ45 cordset retention in the plug: 100 N in the axis
- Mating cycles: 500 min
- Improved EMI Protection
- Compatible with cable diameter from 5,5 mm [0.216 in] to 13 mm [0.512 in]

Applications

- Telecom Equipment
- Video Control
- Robotics
- Industrial Process Control
- CNC Machines
- Special Machines
- Motion Control
- Tele-maintenance

Environmental Protection

- Sealing: IP67
- Salt Spray > 1000 h
- Fire Retardant / Low Smoke: UL94 V0 and NFF 16102, DIN 5510-2
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 10 nano s.
- Thermal Shock: 5 cycles at - 40°C / +100°C
- Operating Temperature: - 40°C / +85°C

Data Transmission

10 BaseT, 100 BaseTX and 1000 BaseT networks
Cat 5e per TIA/EIA 568B and ClassD per ISO/IEC 11801

RJF allows you to use an Ethernet Class D / Cat. 5e connection for 10 BaseT, 100 BaseTX or 1000 BaseT networks in harsh environments:
With the patented RJStop® system you can use a standard RJ45 cordset in a metallic plug which will protect it from shocks, dust and fluids.
No hazardous on-field cabling and grounding!

ROHS COMPLIANT

"N": nickel plating

"B": black coating

MAIN CHARACTERISTICS

- Compliant with IEC 60603-7 variant 11
- Bayonet coupling ("Audible & Visual" coupling signal)
- Robust metallic shells based on MIL-C-26482
- RJ45 cordset retention in the plug: 100 N in the axis
- Mating cycles: 500 min
- Sealed against fluids and dust (IP67)
- Shock, Vibration and Traction resistant
- No cabling operation in field and no tools required
- Mechanical Coding / Polarization (4 positions)
- Compatible with cable diameter from 5,5 mm [0.216 in] to 13 mm [0.512 in]

Applications

- Robotics
- Industrial Process Control
- CNC Machines
- Special Machines
- Oil & Gas
- Motion Control
- Data Acquisition and Transmission in Harsh Environment
- Tele-maintenance

Environmental Protection

- Sealing: IP67
- Salt Spray: 48 h with Nickel plating
> 96 h with black coating
> 500 h with Oliv Drab Cadmium
- Fire Retardant / Low Smoke: UL94 V0 and NF F 16 101 & 16 102
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 10 nano s.
- Shocks: IK06: weight of 250 g drop from 40 cm [15.75 in] onto connectors (mated pair)
- Humidity: 21 days, 43°C, 98% humidity
- Thermal Shock: 5 cycles at - 40°C / +100°C
- Temperature Range: - 40°C / +85°C

- Nickel jam nut receptacle, solder termination: RJF 72 N 00

Plug:

- Shell type 6 with Plastic or Metal Gland

Receptacles:

- Square flange receptacle
4 mounting holes: Shell type 2

- Jam nut receptacle
Hexagonal Nut mounting:
Shell type 7

- Receptacles with IP67 backshell:
Shell type 2PE and 7PE with Plastic or Metal Gland

Back Terminations:

Type 1: Female RJ45

Type 2: RJ45 Cordset

Type 2 - 00: Solder - 8 tinned holes

Notes: • Type 2 without RJ45 plug at the end of the cable are also available: consult factory

• Type 1 also available with 90° female RJ45

Universal: Can be used with all standard RJ45 Cat.5e cordset brands

Assembly instructions

1. Push down the RJ45 cordset latch, and fix it inside the insert
2. Press in and click the other part of the insert
3. Insert in the metallic housing

Easy and Safe: No field cabling tools required

Right Angle Receptacles

ROHS COMPLIANT

"N": nickel plating

"B": black coating

Some applications have minimal space inside the system. The right angle receptacles meet this need while keeping the advantage of connecting a standard RJ45 cordset at the back.

Square Flange Receptacle - 4 mounting holes - Right Angle - 4 clocking positions:

PART NUMBERS:

Black coating: **RJF21RAB**

Nickel plating: **RJF21RAN**

Olive Drab Cadmium plating: **RJF21RAG**

Jam Nut Receptacle - Hexagonal nut mounting - Right Angle - 4 clocking positions:

PART NUMBERS:

Black coating: **RJF71RAB**

Nickel plating: **RJF71RAN**

Olive Drab Cadmium plating: **RJF71RAG**

Inline Cable Mount Receptacles

Inline receptacles allow you to make cable extensions in the field by using them with rugged RJFied series plugs.

PART NUMBERS:

Plastic Gland

Black coating: **RJF2PEWF1B**

Nickel plating: **RJF2PEWF1N**

Olive Drab Cadmium plating: **RJF2PEWF1G**

Metallic Gland

Black coating: **RJF2PEMWF1B**

Nickel plating: **RJF2PEMWF1N**

Olive Drab Cadmium plating: **RJF2PEMWF1G**

PCB Tails Receptacles

These receptacles can be soldered directly on your PCB. A compound insures a transversal sealing and good performance in high vibration environments. They can be connected with rugged RJField series plugs.

PCB LAYOUT – SOLDER FACE VIEW

PANEL DRILLING

PART NUMBERS:

Note:

1. Platings available:

"B": black coating

"N": nickel plating

"G": olive drab cadmium plating

2. As these receptacles are compounded, coding position has to be chosen before ordering

Examples:

Square flange receptacle – black coating – coding A: **RJF2SA5B**

Square flange receptacle – nickel plating – coding C: **RJF2SC5N**

Square flange receptacle – olive drab cadmium plating – coding D: **RJF2SD5G**

Insert Codes

Keying

Environmentally Sealed Receptacles

In some applications, a **transversal sealing** for the receptacle is a « must ». This will prevent fluids and dust from going through the receptacle when plug or cap are not mated to the receptacle. The sealed solution (version "S") has a compound at the rear of the receptacle as shown on the picture. For more information, please consult datasheet RJF-RJFTV Environmentally Sealed Receptacles, page 24.

Applications

- Data Acquisition and Transmission in harsh environment
- Railways
- Radars
- Shelters
- Battlefield Communication
- Systems
- Navy

Data Transmission

10 BaseT, 100 BaseTX and 1000 BaseT networks
Cat 5e per TIA/EIA 568B and ClassD per ISO/IEC 11801

RJFTV allows you to use an Ethernet Class D / Cat. 5e connection for 10 BaseT, 100 BaseTx or 1000 BaseT networks in harsh environments.

With the patented RJStop system you can use a standard RJ45 cordset in a metallic plug which will protect it from shocks, dust and fluids.

No hazardous on-field cabling and grounding!

MAIN CHARACTERISTICS

- Sealed against fluids and dusts (IP67)
- Shock, Vibration and Traction resistant
- No cabling operation in field and no tools required
- Mechanical Coding / Polarization (4 positions)
- Improved EMI protection
- **Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device**
- **Robust metallic shells**
- RJ45 cordset retention in the plug: 100 N in the axis
- Mating cycles: 500 min
- Compatible with cable diameter from 5,5 mm [0.216 in] to 13 mm [0.512 in]

Environmental Protection

- Sealing: IP67
- Salt Spray: 48 h with Aluminium shell - Nickel plating
500 h with Aluminium shell - Olive Drab Cadmium plating
1000h with Marine bronze shell
- Fire Retardant / Low Smoke: UL94 V0 and NF F 16 101 & 16 102
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 10 nano s.
- Compounded versions tested per NAS 1599 (5-3000 Hz, 20g, 12h)
- Shocks: IK06: weight of 250 g drop from 40 cm [15.75 in] onto connectors (mated pair)
- Humidity: 21 days, 43°C, 98% humidity
- Thermal Shock: 5 cycles at - 40°C / +100°C
- Temperature Range: - 40°C / +85°C

100BTX:	(=568B)					

- Examples:
- Olive Drab Cadmium plug with plastic gland: RJF TV 6G
 - Olive Drab Cadmium Jam Nut Receptacle, female RJ45 back termination: RJF TV 71G
 - Nickel Jam Nut Receptacle, 1,5 m 100 BTX cordset back termination: RJF TV 72N 15 100BTX
 - Olive Drab Cadmium in line Square Flange Recept., 0,3 m 100 BTX cordset back termination: RJF TV 2PE 2 G 03 100BTX
 - Nickel Jam Nut Receptacle Solder termination 8 tinned holes: RJF TV 22 N 00

Plug:

- Shell type 6 with Plastic or Metal Gland

Receptacles:

- Square flange receptacle
4 mounting holes: Shell type 2

- Jam nut receptacle
Hexagonal Nut mounting:
Shell type 7

- Receptacles with IP67 backshell:
Shell type 2PE and 7PE with Plastic or Metal Gland

Back Terminations

Type 1: Female RJ45

Type 2: RJ45 Cordset

Type 2 - 00: Solder – 8 tinned holes

Notes Type 2 without RJ45 plug at the end of the cable are also available: consult factory

Insert removal tool: RJF ODE

RJF TV

SELF CLOSING CAP (SCC SERIES)

This Self Closing cap automatically protects the RJF TV square flange receptacle (MIL-DTL-38999 type), protecting your system from dust and water projection. A spring automatically closes the upper part of the cap when the RJF TV plug is removed from the receptacle.

■ Panel Gasket for square flange receptacle
(Thickness: 0,8 mm [.031]):

PART NUMBER: JE19

PART NUMBER:

Self closing cap only: **RJFTVSCC**

Remark: Compatible only with RJFTV square flange receptacle type: RJFTV2XXX (see page 15)

RJFTV series receptacles and plugs with EMI backshells provide a solution with 360° shielding: same protection than the one proposed by standard MIL-DTL-38999 series III connectors. With those solutions we recommend using our reinforced and double shielded cat5E cable, see page 25.

SQUARE FLANGE RECEPTACLE

PART NUMBERS:

Olive Drab Cadmium Plating: **Kit38082**

Nickel Plating: **Kit38082NI**

Kit38082 and Kit38082NI include:

JAM NUT RECEPTACLE

PART NUMBERS:

Olive Drab Cadmium Plating: **Kit38204**

Nickel Plating: **Kit38204NI**

Kit38204 and Kit38204NI include:

IMPORTANT NOTE

With these receptacles, customer will have to solder his own cable on the PCB. So the wire positions have to be defined by the customer according to his network.

PLUGS

PART NUMBERS:

Olive Drab Cadmium Plating: **Kit38081**

Nickel Plating: **Kit38081NI**

Kit38081 and Kit38081NI include:

IMPORTANT NOTE

With these plugs, the standard RJ45 plug is not provided. Customer will have to crimp a standard RJ45 on the cable by himself.

We advise using our double Shielded, reinforced Cat5E cable (see page 25) with these RJFTV series EMI connectors. If customer wants to use his own cable, please check with us regarding compatibility with our backshells: contact@rjfield.com.

We also provide assembled cordsets, (see examples below). For this type of solution please provide the configuration needed: length, description of second end...

Right Angle Receptacles

ROHS COMPLIANT

"N": nickel plating

Some applications have minimal space inside the system. The right angle receptacles meet this need while keeping the advantage of connecting a standard RJ45 cordset at the back.

Olive Drab Cadmium plating – Metallized inserts: **RJFTVB2G ISO NI**

Environmentally Sealed Receptacles

RJF TV 7SA2 G 05 100BTX

In some applications, a transversal sealing for the receptacle is a « must ». This will prevent fluids and dust from going through the receptacle when plug or cap are not mated to the receptacle. The sealed solution (version "S") has a compound at the rear of the receptacle as shown on the example. In addition, the Sealed RJF TV have been successfully tested in very high vibration corresponding to airplanes applications. For more information, please consult datasheet RJF-RJFTV Environmentally Sealed Receptacles (see page 24).

PCB Tails receptacles

These receptacles can be soldered directly to your PCB. A compound insures a transversal sealing and good performance in high-vibration environments. The shell of those receptacles are in the « Stand Off » style. They can be connected with RJFTV series plugs.

SEALED RECEPTACLE In some applications, a transversal sealing for the receptacle is a « must ». This will prevent fluids and dust from going through the receptacle when plug or cap are not mated to the receptacle. The sealed solution (version "S") has a compound at the rear of the receptacle as shown on the examples below. This feature is available both in RJF and RJF TV shells (please consult the relevant data sheet for product details and accessories). In addition, the Sealed RJF TV have been successfully tested in very high vibration corresponding to airplane applications.

Applications

- Outdoor Equipment
- Airplanes Equipment
- Tactical Radios
- Shelters
- Rugged computers
- Data Acquisition and Transmission in Harsh Environments

Data Transmission

10 BaseT, 100 BaseTX and 1000 BaseT networks
Cat 5e per TIA/EIA 568B and ClassD
per ISO/IEC 11801

ROHS COMPLIANT

"N": nickel plating
"B": black coating
"BZ": marine bronze (only for RJFTV)

MAIN CHARACTERISTICS

- Same as the RJF and RJF TV series ... a complete IP67 sealing of the receptacle (even with no plug or no protective cap mated) is added. IP 67 means immersion during 30 minutes under 1 meter of water (watertight).
- Outside dimensions are the same as the standard RJF and RJF TV series.
- Vibrations: The compounded versions of the RJF TV have been tested in vibration following the NAS 1599 Aeronautic specification (Ambient temperature): 5 - 3000 Hz, 20g, 2,5 mm [.1 inch] double amplitude, 3 axes, 12 hours
Note: This specification exceeds MIL-C-26500 requirements.

RJFTV 7S A 2G 15 100BTX

IMPORTANT NOTE

Due to the compound, the coding of the connector must be done in the factory: use the codes A, B, C or D in the Part Number.

CABLE CAT 5E

High Reliability Cat 5e Ethernet Cable & Cordsets

General Construction: A 4 pair, 24 AWG, 100 Ohm SFTP round patch cable, designed to the ISO / IEC 11801 Category 5e requirements (cat 5e on 76m). The cable contains 4 twisted pairs, cabled, double shielded with kevlar reinforcement strands, jacketed in black UV resistant Polyurethane HFFR. Designed for fixed or portable applications in harsh environments.

HFFR: Halogen Free Flame Retardant

Jacket Compound Specification:

Halogen Free Flame Retardant Polyether-based Polyurethane. Glossy finish. Excellent hydrolysis resistance. High microbial resistance. UV resistant. High flexibility.

ROHS COMPLIANT

Applications

- Robotics
- Motion Control
- Railways
- CNC Machines
- Battelfield communication
- Industrial Process Control

USBF TV

USB Connection System for Harsh Environment

Applications

- Embedded Computers
- Data Acquisition and transmission in harsh environment
- Railways
- Battelfield Communication Systems
- Navy Systems

ROHS COMPLIANT

"N": nickel plating
"BZ": marine bronze

Data Transmission

USB Specification 2.0

Data Rate: Up to 480 Mb/s for High Speed USB

With USB Field, you can insert a standard USB 2.0 cordset into a metallic plug which will protect it from shocks, dust and fluids.

No hazardous on-field cabling and grounding!

This metallic plug is connected into a receptacle, using a Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device for high vibrations.

MAIN CHARACTERISTICS

- Sealed against fluids and dusts (IP67)
- Shock, Vibration and Traction resistant
- No cabling operation in field and no tools required
- Mechanical Coding / Polarization (2 positions)
- Improved EMI protection
- Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device
- 2 mechanical Coding / Polarization possibilities by the user (receptacle insert rotation)
- USBF TV plug retention in the receptacle: 100 N in the axis
- Mating cycles: 500 to 1500

Environmental Protection

- Sealing (when mated): IP67 (Temporary immersion)
- Salt Spray: 48 h with Nickel plating
> 500 h with Olive Drab Cadmium
1000 h with marine bronze shell
- Fire Retardant / Low Smoke: UL94 V0 and NF F 16 101 & 16 102
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 1micro s
- Shocks: IK06: weight of 250 g drop from 40 cm [15.75 in] onto connectors (mated pair)
- Humidity: 21 days, 43°C, 98% humidity
- Temperature Range: - 55°C / +85°C

holes for solder termination

Assembly Instructions

Can be used with most the USB cordset brands: No tools required!

Plug Assembly

1. Only if you need a full sealing (IP67): Install the white sticker around the plug, covering the 4 little holes of the overmolding
2. Insert the black O Ring around the front face of the USB A plug. This O Ring will ensure connection sealing
3. Insert the USB cordset into the metallic backshell
4. Insert the retention spacer laterally to the cable (this spacer is soft, in order to adapt to different shapes of overmolding) and slide the overmolding of the USB-A plug into this retention spacer
5. Insert the friction ring laterally to the cable
6. Choose the right coding (2 positions) and insert the USB-A plug into the protective plug. Note at this step, the main key is used for polarization.
7. Screw the backshell on the plug body. A wrench can be necessary to fully tighten it, and the connection to the receptacle can help

IMPORTANT NOTE

The connection sealing is not done by the black retention spacer (which is slotted), but by the front face ORing (see 2)

Receptacle Assembly

Insert the USB module from the rear. Reference is main key. Beware to have a coding compatible with the coding you used for the plug: on front view, the white shapes in the USBs must be on the same side.

To remove the USB module, insert the removal tool USBF ODE from the front, and push back the module.

RECEPTACLES WITH 360° EMI BACKSHELLS

USBTV Receptacles series with EMI backshells provide 360° shielding; same protection than the one proposed per Standard MIL-DTL-38999 series III Connectors. We offer these EMI backshells with square flange and jam nut receptacles. The available platings are nickel or olive drab cadmium. With those solutions we suggest using our reinforced USB cable (shielded – zero halogen jacket). See page 32

We can provide those receptacles:

- with cordset already soldered
- without cordset

For 360° shielded USBFTV series receptacles, please consult us:

www.usbfield.com

EXAMPLE WITH A SQUARE FLANGE RECEPTACLE (PROVIDED WITHOUT CABLE)

IMPORTANT NOTE

With receptacles provided without cable, customer will have to solder his cable on the PCB, please find below the cabling specification. If customer prefers to use his cable, please check with us compatibility with our EMI backshells:

www.usbfield.com

ROHS COMPLIANT

PC TAILS RECEPTACLE WITH « STAND OFF » SHELL

Those receptacles can be soldered directly on your PCB. A compound insures a transversal sealing and good performance in high-vibration environments. The shell of these receptacles are in the « Stand Off » style. They can be connected with rugged USBFTV series plugs.

PART NUMBERS:

- Rugged Communications

Data Transmission

IEEE 1394a-2000
400 Mbits/second over 4.5 meters

With FW Field, you can insert a standard IEEE1394 cordset into a metallic plug which will protect it from shocks, dust and fluids.

No hazardous on-field cabling and grounding!

This metallic plug is connected into a receptacle, using a Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device for high vibrations.

MAIN CHARACTERISTICS

- No assembly tools required
- Sealed against fluids and dusts (IP67)
- No time-consuming in-field cabling operation necessary
- **Tri-start thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device**
- FW plug retention in the receptacle: 100 N in the axis
- Mating cycles: 500 to 1500 times
- Improved EMI protection

Environmental Protection

- Sealing (mated): IP67 (Temporary immersion - 1 meter up to 30 minutes)
- Salt Spray: 48 h with Nickel plating
> 500 h with Olive Drab Cadmium
- Fire Retardant / Low Smoke: UL94 V0 and NF F 16 101 & 16 102
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 1micro s
- Shocks: IK06: weight of 250 g drop from 40 cm [15.75 in] onto connectors (mated pair)
- Humidity: 21 days, 43°C, 98% humidity
- Temperature Range: - 55°C / +85°C

version - with 6 tinned holes
for solder termination

Assembly Instructions

Can be used with most IEEE 1394 cordset brands: No tools required!

Plug Assembly

1. If a fully sealed (IP67) assembly is required: Install the white tape around the plug to cover the 4 holes of the overmolding. If there are no holes omit this step.
2. Insert the black O Ring around the front face of the IEEE 1394 plug. This O Ring will ensure the seal.
3. Insert the IEEE 1394 cordset into the metallic backshell.
4. Insert the retention spacer laterally onto the cable (this spacer is soft so as to adapt to various overmolding styles) and slide the IEEE 1394 plug into this retention spacer.
5. Insert the friction ring laterally onto the cable cordset.
6. Insert the IEEE 1394 plug into the metallic circular shell. Note at this step that the main key is used for polarization.
7. Screw the backshell on the plug body. A spanner may be required to fully close the backshell to the circular shell.

Important Note: The sealing of the connector is not done by the black retention spacers which are slotted, but rather by the front face O-Ring (Fig 2).

Receptacle Assembly

To Solder your cable onto the PCB:

1. Attach the 2 metallized plastic inserts around the PCB (Fig 1a & 1b).
2. Insert the IEEE 1394 module from the rear of the connector.

Removing Modules

1. Insert the removal tool FWF ODE from the front
2. Push the module back with thumb.

SELF CLOSING CAP

For RJ Field, USB and IEEE1394 receptacles

Self Closing Cap

This Self Closing Cap automatically protects the RJ Field square flange receptacles (MIL-C-26482 type), protecting your system from dust and water projections. The same cap can be used to protect USB and IEEE1394 receptacles. A spring automatically closes the upper part of the cap when either the RJ Field plug, RJ45 cordset, USB or IEEE1394 cordset, or USB key are removed from the receptacle.

RJ11F

Rugged RJ11/RJ12 Connection System for Harsh Environment

RJ11Field allows you to use a standard phone RJ11 / RJ12 connection in harsh environments. With the patented RJStop® system you can use a standard RJ11 / RJ12 cordset in a metallic plug which will protect it from shocks, dust and fluids. **No hazardous on-field cabling!**

MAIN CHARACTERISTICS

- **Bayonet coupling** ("Audible & Visual" coupling signal)
- **Robust metallic shells based on MIL-C-26482**
- 4 mechanical user-defined coding / Polarization settings (insert rotation)
- RJ11 cordset retention in the plug: 100 N in the axis
- Mating cycles: 500 min

Environmental Protection

- Sealing: IP67
- Salt Spray: 48 h with Nickel plating
> 96 h with black coating
> 500 h with Oliv Drab Cadmium
- Fire Retardant / Low Smoke: UL94 V0 and NF F 16 101 & 16 102
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 10 nano s.
- Shocks: IK06: weight of 250 g drop from 40 cm [15.75 in] onto connectors (*mated pair*)
- Humidity: 21 days, 43°C, 98% humidity
- Thermal Shock: 5 cycles at - 40°C / +100°C
- Temperature Range: - 40°C / +85°C

Applications

- Industrial applications
- Battlefield communication

MTRJF TV

Transform your MTRJ patchcord into an Environmental Connector

With MTRJF TV you can use a standard MTRJ patchcord in a metallic plug which will protect it from shocks, dust and fluids.

No hazardous on-field cabling!

The MTRJ Field offers an easy system to upgrade from a standard to an environmental MTRJ.

- Sealed against fluids and dust (IP67)
- Shock, Vibration proof,
- No cabling operation in field and no tools required for installation

MECHANICAL CHARACTERISTICS

- Number of Channels: 1/2/4
- Typical Insertion Loss: 0,5db in MM
- Durability: 500 mating/unmating cycles (changes for <0,2 db)

Applications

- Factory Automation
- Robotics
- Process Control
- Transportation Systems
- Data Acquisition & Transmission

KEY FEATURES

- Redundant power inputs with surge/spike protection
- Ultra reliable 1,000,000 hours MTBF
- Hazardous location: operation in Zone 2
- Wide operating temperature range of -40°C to 70/85°C
- Rugged metal packaging with DIN rail or direct panel mounting
- Auto-detecting, auto-crossover and auto-polarity
- Full-Duplex operation with flow control (no collisions!)
- Ring Switch Networking Features
 - Real-Time Ring for ultra-fast fault-tolerant loops
 - Recovery time of 30 ms + 5 ms per hop!
 - Ideal for deterministic systems and PLCs
 - Real-time traffic prioritization
 - Port mirroring for traffic diagnostic

Managed Switch Networking Features

- Rapid Spanning Tree (RSTP) for fast redundant rings
- Priority queuing for real-time performance (QoS and CoS)
- SNMP v1 and v2 for network management
- SNMPv3 for authentication and encryption
- IGMP for multicast filtering
- VLAN for traffic segregation
- User friendly configuration (web, Telnet, RS232)
- Encryption using HTTPS, SSL, SSH, SNMPv3
- Message filtering to stop broadcast storms
- RMON and port mirroring for diagnostics
- The Power of Linux Inside

DESCRIPTION

SC or ST fiber connector (1, 2 or none)

DIN-Rail or Panel Mounting Fixture

5 or 9 connectors (RJ45, SC or ST fiber)

Unmanaged, Ring or Managed Capability

Indicators for Power, Alarm Output Status

Indicators for Link Status and Datarate

● 10 Mbps

● 100 Mbps

Terminal block for Redundant Power Inputs + Alarm Output

RJ Switch

ROHS COMPLIANT

Harsh Environment Industrial Ethernet Switch
Plastic Enclosure - IP67

Rugged & Waterproof Switch

Amphenol offers a small size 5 port waterproof Ethernet Switch that can withstand a variety of extreme conditions - low & high temperatures, shocks & vibrations, dust particles or even liquid immersion. This is an easy way to make the Ethernet networks of your manufacturing site, automation or control units deterministic.

Amphenol IP67 Industrial Ring Switch

Amphenol IP67 Ring Ethernet switch is a combination of very fast, fault-tolerant network redundancy Sixnet technology and IP67 sealed & rugged packaging, specifically designed for the harshest environments.

Rings self-configure and just run, without any complex configuration.

The switch board is sealed within a waterproof IP67 polyester enclosure suitable for highly corrosive environments. The polyester material is glass fiber reinforced. This makes it very rugged against shocks and vibration.

The I/O interfaces are waterproof & rugged RJ45 connectors from the RJ FIELD plastic circular series.

Key Features

- Waterproof IP67 Rating (NEMA 6)
- Reduced Installation Costs with the patented RJStop® system
- Use any standard RJ45 cordset
- Rugged Enclosure in Polyester reinforced with 30% glass fiber
- Redundant power inputs with surge/spike protection
- Ultra reliable 1,000,000 hours Mean Time Between Failure (MTBF)
- Zone 2 hazardous location
- Ring Switch Networking Features (managed features available!)
 - Real-Time Ring for ultra-fast fault-tolerant loops
 - Recovery time of 30 ms + 5 ms per hop!
 - Modbus monitoring over Ethernet
 - Ideal for deterministic systems and PLCs
 - Real-time traffic prioritization (QoS and CoS)
 - Assure delivery of real-time data
 - Improve network utilization
 - User settable priority assignments
 - Advanced switch features
 - User configurable port settings
 - Port mirroring for traffic diagnostics
 - Pre-configurable for Plug-And-Play simplicity

Shocks:	IEC60068-2-27
Vibrations:	IEC60068-2-6
Free Fall:	IEC60068-2-32
Hazardous Location:	UL1604, CSA C22.2/213 (Class 1, Div. 2), EN50021/Zone 2

Ethernet features

Ports	5 Shielded RJ45 ports 10/100BaseTX
Ethernet switch type	Intelligent store & forward
Full / Half Duplex	Configurable
RJ45 speed	10 or 100 Mbps auto-negotiation
RJ45 MDI/MDIX	Auto-crossover connection
RJ45 TD and RD polarity	Auto-polarity
Typical latency	16 us + frame time @ 10 Mbps (varies on load and settings) 5 us + frame time @ 100 Mbps
MAC addresses supported	2048
Memory bandwidth	3.2 Gbps
Ethernet isolation	1500 Vrms 1 minute
Ring features (for Ring model only)	Link loss recovery time: 30 ms plus 5 ms per hop Maximum switches in ring: 50+ Dual Ring support

Power Supply

Input power (typical)	ES: 2,4 W ; RS: 2,7 W
-----------------------	-----------------------

Status Reporting (for Ring model only)

"OK" contact output	Output current: 0.5 A max
"OK" contact State	OFF when a fail occurs ON when power and switching is OK

Environmental

Operating Temperature	- 40°C to +75°C
Storage Temperature	- 40°C to +85°C

Weight

0.54 kg

Real-Time Ring Switches

Amphenol Real-Time Ring switches combines the Plug&Play simplicity of an unmanaged switch with high performances of Sixnet Ring managed switches.

- **Real-Time fault-tolerant Ring**
Recovery time of 30 ms + 5 ms per hop!
- **Real-Time traffic prioritization (QoS & CoS)**
Assure delivery of real-time data
- **Available Managed features**
User configurable port settings
Port mirroring for traffic diagnostics
Pre-configurable for Plug & Play simplicity

The use of such switches provides a fast network and avoids faults. When a break occurs, the switch instantly transfers data to new path. The link loss recovery is 30 ms plus 5 ms times the number of Ring switches in the ring. For example, 10 ring switches will recover in less than 80 ms. Rings can be pre-configured to "just run". They don't need an assigned IP address. But if you like, you can fine tune the performance of the ring by using a simple Windows wizard (which is free).

Ring networks can be divided into multiple "sub-rings" which enhance reliability and recovery speed through small ring paths.

The prioritization of messages assures delivery of real-time data. Some applications need to force no-real-time data (such as video information) to lower priority and force critical real-time data at higher priority. Network utilization is improved.

This combination of Ethernet technology associated with rugged and sealed protective enclosure is the ideal solution to deliver deterministic performance to your industrial systems even in the harshest environment!

Description (example for Ring model)

Dimensions (mm/inch)

Accessory: Plugs for RJ45 ports

Part Numbers

Series	RJS-PC	5ES	1
IP67 RJ-Switch, with polyester body			
Type of Electronics			
5RS:	5 ports 10/100 Mbps, Ring switch (standard order)		
5ES:	5 ports 10/100 Mbps, Unmanaged switch (special order)		
Connectors			
1:	RJ45 ports, 10/100BaseT(X)		
1CAPS:	Caps are attached on both power and data receptacles		
Military Rated Protection			
Blank:	Industrial protection (standard order)		
EP:	Extended power protection exceeds MIL-STD-1275 (special order)		

Example IP67 Ethernet Ring switch, 5 ports 10/ 100 Mbps, with caps attached on the receptacles: RJS-PC-5RS-1CAPS

Note The Ring model is pre-set for 1 ring enabled on the ports 4 and 5.
You may change the configuration by using the free windows configuration tool.
Simply choose the desired pair of ports for your new enabled ring.

Accessories

- P/N: RJF PC5 PWR
Plug for power port
Sealing protection: IP67

- P/N: RJF RB 6
Plugs for RJ45 ports
Sealing protection: IP67

RJ Switch

Harsh Environment Gigabit Military Ethernet Switches
Sealed and Rugged Military Ethernet Switches

RJ Switch

Sealed, Rugged & Waterproof Switch

Amphenol offers 9 ports managed, RING and unmanaged Ethernet Switches that can withstand a variety of extreme conditions. Whatever the situation - high temperatures, extreme shocks & vibrations, dust particles or even liquid immersion there is a solution available.

This is an easy way to make the Ethernet networks of your systems deterministic. Up to 3 gigabit ports are offered! The switch electronics are sealed within a waterproof IP67 metallic enclosure. The conductive cadmium plating is suitable for most demanding EMI-RFI environments. The I/O interface includes redundant power inputs as well as waterproof rugged RJ45 connectors from the RJF TV FIELD threaded product series based on MIL-DTL-38999 (Series III) metallic shell size 19. This series enables the transformation without tooling of any standard RJ45 cordset into a robust and waterproof connection system.

Key Features

Rugged environmental features

- Rugged metal packaging with cadmium olive drab protection
- MIL-DTL-38999 III connectors for both power and Ethernet ports
- IP65/IP67 rated
- MIL-STD-1275 Surge and Spike protection (*)
- MIL-STD-810F shocks
- Wide operating temperature range of -40°C to 70°C
- Altitude 3000m height ; transportation 10000m height

Ethernet features

- 3 ports 10/100/1000-BaseT(X) + 6 ports 10/100-BaseT(X) (*)
- Unmanaged, RING unmanaged and **Managed** models
- Full-Duplex operation with flow control (no collisions!)
- Auto-detecting, auto-crossover and auto-polarity

Applications

Military Applications

- Data Acquisition & Transmission
- Battlefield Communication C4ISR
- Rugged Networks
- Mobile Communications
- Submarine
- Avionic & Shipboard Systems

Features for ring and managed models.

RING switch

- Ring for fast fault-tolerant loops
- Recovery time of 30 ms + 5 ms per hop!
- QoS and CoS priority queuing

MANAGED switch

- RSTP for redundant rings
- QoS and CoS priority queuing
- SNMPv3 authentication and encryption
- IGMP for multicast filtering
- VLAN for traffic segregation
- And much more!

(*): depends on models

Managed & Unmanaged Switch Features

IEEE Ethernet Standards

Models	Features	802.3/u	802.3x	802.3z	802.1p	802.1D	802.1w	802.1Q
RJS ML 9ES	Unmanaged	✓	✓					
RJS ML 9RS	RING	✓	✓		✓			
RJS ML 9RG	RING - Gigabit	✓	✓	✓	✓			
RJS ML 9MS	Managed	✓	✓		✓	✓	✓	✓
RJS ML 9MG	Managed - Gigabit	✓	✓	✓	✓	✓	✓	✓

IEEE 802.3 /u	10 Mbps Ethernet and 100 Mbps Fast Ethernet
IEEE 802.3x	Full-Duplex with Flow Control
IEEE 802.3z	Gigabit 1000 Mbps Ethernet
IEEE 802.1p	Priority queuing – QoS, CoS, ToS/DS
IEEE 802.1D/w	Rapid Spanning Tree for redundant rings and Spanning Tree (interoperability)
IEEE 802.1Q	VLAN for traffic segregation

Regulatory Approvals

EMI emissions	EN55022 class A, FCC part 15, ICES-003
EMC immunity	IEC61326-1, IEEE C37.90
Shocks:	MIL-STD-810F: 40g, 11ms, 18 saw tooth shocks

Power Supply

24V DC Input	10 - 30V DC for 9ES model (single power) 10 - 50V DC redundant for 9RS models 10 - 30V DC redundant for 9RG, 9MS and 9MG models
Input power	4 to 9 W typical (all ports active), depends on models
Connectors for power	MIL-DTL-38999 III Jam nut receptacle, olive drab cadmium plated 9ES models: 1 connector TV07RW 0998P: 3 cts # 20 (wire 0.6 mm ² maxi) Other models: 2 connectors TV07RW0935P: 6 cts # 22D (wire 0.4 mm ² maxi) The second connector facilitates the cabling for redundant power.

Ethernet features

RJ45 ports	9 shielded RJ45 ports 10/100 Base T(X) or 1000 Base T(X)
Connectors for RJ45 ports	RJFTV 7 G: Jam nut receptacle based on MIL-DTL-38999 III Olive drab cadmium plated
Full / Half Duplex	Automatic or configurable
MDI / MDIX	Auto-crossover connection
RJ45 speed	10, 100 or 1000 Mbps auto-negotiation
Typical latency	16 us + frame time @ 10 Mbps (varies on load and settings) 5 us + frame time @ 100 Mbps
MAC addresses supported	2048 8192 (gigabit models)
Memory bandwidth	3.2 Gbps 32 Gbps (gigabit)

Temperature

Operating Temperature	- 40°C to +70°C
Storage Temperature	- 40°C to +85°C

Status (Ring models)

"OK" contact output	Sourcing power
Maximum current	0.5 A

Weight

approx 2.2Kg

EXCEEDS MIL-STD-1275

Power ratings protection	Industrial specifications 9ES1; 9MS1; 9RG1; 9MG1	MIL-STD-1275 Specifications RJS-ML-9RS1
Surge		100 V for 1s
Transient	15 KW peaks	15 KW peaks 5 KW (10x for 10 μs)
Spike	5 KW (10x for 10 μs)	250 V (50x for 100 μs)

Real-Time Ring Switches

Amphenol Real-Time Ring switches combines the Plug&Play **simplicity** of an unmanaged switch with **high performances** of managed switches.

Real-Time fault-tolerant Ring

Recovery time of 30 ms + 5 ms per hop!

Real-Time traffic prioritization (QoS & CoS)

Assure delivery of real-time data

Available Managed features

User configurable port settings

Port mirroring for traffic diagnostics

Pre-configurable for Plug & Play simplicity

The use of such switches provides a fast network and avoids faults. When a break occurs, the switch instantly transfers data to new path. The link loss recovery is 30 ms plus 5 ms times the number of Ring switches in the ring. For example, 10 ring switches will recover in less than 80 ms. Rings can be pre-configured to "just run". They don't need an assigned IP address. But if you like, you can fine tune the performance of the ring by using a simple Windows wizard (which is free).

Ring networks can be divided into multiple "sub-rings" which enhance reliability and recovery speed through the small ring paths.

Dimensions (mm/inch) *Military Aluminum ML Enclosure*

Pin-out for power

Pin-out for the 9ES1 models

Pin-out for the 2 power connectors of the Ring and managed models

Note: The use of 2 connectors facilitates the cabling of redundant power inputs.

Part Numbers

Series	RJS	ML	9ES1	-
RJ-Switch				
Type of Enclosure				
ML: Aluminum, OD Green Cadmium Plating & MIL-DTL-38999 (Series III) Receptacles				
Type of Electronics				
9ES1: Unmanaged 9 ports 10/100 Base T(X)				
9RS1: Unmanaged RING 9 ports 10/100 Base T(X)				
9RG1: Unmanaged RING 6 ports 10/100 Base T(X) + 3 ports 10/100/1000 Base T(X)				
9MS1: Managed 9 ports 10/100 Base T(X)				
9MG1: Managed 6 ports 10/100 Base T(X) + 3 ports 10/100/1000 Base T(X)				
Accessories: Caps for receptacles fixed with string directly to the receptacle				
Blank: No caps included. Note: Without caps, the Ethernet ports are still sealed but the contacts are not protected				
Caps: Attached caps for both power and data included				

Example: Unmanaged RING switch in an aluminum enclosure with olive drab green conductive cadmium plating, 9 ports 10/100 Base T(X) & RJF TV threaded coupling receptacles & caps added to the switch: **RJS ML 9RS1 CAPS**

Accessories

Plugs for Ethernet ports RJF TV 6 M G

Based on MIL-DTL-38999
No tool required!

Plugs for I/O ports: MIL-DTL-38999, cadmium plated, crimp contacts.

For 9ES1 model

One plug TV 06 RW 0998 S (3 cts #20)

For 9RS1, 9RG1, 9MS1 and 9MG1 models

Two plugs TV 06 RW 0935 S (6 cts # 22D)

Backshells for I/O plugs

We suggest to use MIL-DTL-38999 III backshells.
Consult the dedicated catalog.

Example:

TVNSA 09 014 shielding backshell

+ **804221** straight heat shrink for sealing

Caps for Ethernet ports RJSMC C7G

A simple screwdriver is needed!

Note: Do not order the caps in addition with pre-equipped - CAPS switches.

USBBF TV (USB-B type)

USB Connection System for Harsh Environment

Applications

- Embedded Computers
- Data Acquisition and transmission in harsh environment
- Railways
- Battelfield Communication Systems
- Navy Systems

Data Transmission

USB Specification 2.0

Data Rate: Up to 480 Mb/s for High Speed USB

With USB Field, you can insert a standard USB 2.0 cordset into a metallic plug which will protect it from shocks, dust and fluids.

No hazardous on-field cabling and grounding!

This metallic plug is connected into a receptacle, using a Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device for high vibrations.

MAIN CHARACTERISTICS

- Sealed against fluids and dusts (IP67)
- Shock, Vibration and Traction resistant
- No cabling operation in field and no tools required
- Improved EMI protection
- Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device
- USBF TV plug retention in the receptacle: 100 N in the axis
- Mating cycles: 500 to 1500

Environmental Protection

- Sealing (when mated): IP67 (Temporary immersion)
- Salt Spray: 48 h with Nickel plating
> 500 h with Olive Drab Cadmium
1000 h with marine bronze shell
- Fire Retardant / Low Smoke: UL94 V0 and NF F 16 101 & 16 102
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 1micro s
- Shocks: IK06: weight of 250 g drop from 40 cm [15.75 in] onto connectors (mated pair)
- Humidity: 21 days, 43°C, 98% humidity
- Temperature Range: - 55°C / +85°C

AVAILABLE FEBRUARY 2008

RJFAST concept

RJ FIELD GLOSSARY

10BASE-T

10 Mbps Ethernet on twisted-pair (Category 3) cable.

100BASE-T

The twisted pair version of 100 Mbps Ethernet. Requires Category 5 cabling.

1000BASE-T

A recent LAN standard for implementing 1000 Mbps Ethernet on Category 5 cable. Also called Gigabit Ethernet.

Auto-MDIX

A protocol which allows two Ethernet devices to negotiate their use of the Ethernet Transmit (Tx) and Receive (Rx) cable pairs. This allows two Ethernet devices with MDI or MDI-X connectors to connect without using a cross-over cable.

Baud

A unit of measurement that denotes the number of bits that can be transmitted per second. For example, if a modem is rated at 9600 baud it is capable of transmitting data at a rate of 9600 bits per second.

Bandwidth

The maximum capacity of a network channel. Usually expressed in bits per second (bps). Ethernet channels have bandwidths of 10, 100, and 1000 Mbps (Gigabit).

bps

Bits Per Second is the unit used for measuring line speed, the number of information units transmitted per second.

Broadcast

A transmission initiated by one station and sent to all stations on the network.

Byte

The amount of memory needed to store one character such as a letter or a number. Equal to 8 bits of digital information. The standard measurement unit of a file size.

Category 5

A performance classification for twisted pair cables, connectors and systems. Specified to 100 MHz. Suitable for voice and data applications up to 155 Mbps.

Category 5 e

Also called Enhanced Category 5. A performance classification for twisted pair cables, connectors and systems. Specified to 100 MHz. Suitable for voice and data applications up to 1000 Mbps.

Category 6

A performance classification for twisted pair cables, connectors and systems. Specified up to 250 MHz.

CSMA/CD

Carrier Sense Multiple Access/Collision Detect. The Medium Access Control (MAC) protocol used in Ethernet.

Data rate

The speed of the data transmission, measured in bps (bits per second) or Mbps.

Duplex (Full, Half)

Full duplex is a communications method that allows for the simultaneous transmission and reception of data. In Half Duplex communication, transmissions and receptions can occur in either direction but not at the same time.

Ethernet

The most common network protocol in use. A protocol is a set of rules enabling data communications. Ethernet can operate over several different media including fiber optic, coaxial cable and twisted-pair cable.

IEEE 802.3

IEEE Working Group for CSMA/CD, the protocol used in Ethernet transmissions.

IGMP snooping

The ability of a switch to observe Internet Group Multicast Protocol (IGMP) traffic in order to learn IP Multicast group membership. The purpose is to restrict multicast transmissions to only those ports which have requested them.

LAN

Local Area Network. A network of directly-connected machines (located in close proximity), providing high speed communication over physical media such as fiber optics, coaxial cable, or twisted pair wiring.

MAC Address

A unique address assigned to a station interface, identifying that station on the network. With Ethernet, this is the unique 48-bit station address. Same as the physical address.

Megabit (Mb)

Megabit. One million bits of information, usually used to express a data transfer rate ; 1 Megabit/second = 1Mbps.

Megabyte (MB)

MegaByte. A unit of data storage size which represents one million characters of information.

Multicast

A transmission initiated by one station to many stations of the network.

Port Mirroring

Port mirroring allows a switch port to monitor packets from any or all of its ports so that traffic can be analysed.

Quality of Service (QoS)

Some switches support QoS (per 802.1p and 802.1Q standards) whereby messages can be assigned levels of priority. QoS is important where time-critical applications can be impaired by data delays.

RJ45

8-position modular jacks used on twisted pair links for Ethernet cabling.

RJ-Field

A wide range of connectors which allow to reinforce and seal standard RJ45 cable. See www.rjfield.com

SNMP

Simple Network Management Protocol. This is THE standard used for switch management programs.

Spanning Tree Protocol (STP)

A link management protocol providing path redundancy and preventing network loops by defining a tree to span all switches in a network. It forces redundant data paths into a standby (blocked) state. If a path malfunction occurs, the topology is reconfigured and the link reestablished by activating the standby path.

TCP/IP

Transmission Control Protocol/Internet Protocol. A set of protocols, resulting from ARPA efforts, used by the Internet to support services such as remote login (TELNET), file transfer (FTP) and mail (SMTP).

TELNET

The Internet standard protocol for remote login (terminal connection) service. TELNET allows a user at one site to interact with a remote timesharing system at another site as if the user's terminal were connected directly to the remote computer.

VLAN

Virtual Local Area Network. A LAN that maps stations on a basis other than location such as by department, user type or application. Managing traffic, workstations, and bandwidth can be easier with a VLAN and improve network efficiency.
